

ENTPROMED[®]

more than breathing...

ENTPROMED®

After having 18 years of experience in export of medical products, ENTPROMED Healthcare Products Industry and Trade Inc. was established in 2020 as the manufacturer and the international supplier of disposable medical item particularly E.N.T. post-operative nasal products with our motto "More than breathing..." The headquarter and warehouse of ENTPROMED Health Products Industry and Trade Inc. are both located in Sultanbeyli region on Asian side of Istanbul - TURKEY.

In 2nd half of 2020, we as ENTPROMED A.S. and our sister company SEVRON A.S. have decided to join their forces on their international sales activities. By this way, now our group companies have wider range of products including medical tapes, all types of first aid plasters, and wound dressings. As we offer a well-organized system which assures effortless fast purchase experiences to our business partners in different countries, and due to high demand of making cooperation on various medical products from different business partners, ENTPROMED has become one of the most important disposable medical device and raw material supplier in the end of 2020.

In 2021, ENTPROMED Health Products Industry & Trade Inc. exports below products to many countries on 3 continents.

ENTPROMED INTERNAL NASAL SPLINTS

Silicone with air-way

ENTPROMED Internal Nasal Splints are used after nasal surgeries (Septoplasties, sinusotomies, rhinoplasties, turbinectomies, epistaxis surgeries and pituitary surgeries), and has to be positioned near the nasal septum.

Made of high-quality medical grade silicone. Its flexibility and structural stability provides greater comfort, ensuring a less traumatic postoperative period and adequate healing of the septum, avoiding complications such as septal hematoma.
100% medical grade silicone for ease of insertion and removal.

Indications :

- * SEPTOPLASTIES
- * SINUSOTOMY
- * RHINOPLASTIES
- * TURBINECTOMIES
- * EPISTAXE SURGERIES
- * HYPOPHYSIC SURGERIES

Integral airway allows post-operative nasal breathing. Allows breathing through the nose and compresses the nasal sidewall, thus helping in the haemostasis of surgeries in the nasal turbinate, besides assisting in ventilation, avoiding synechiae ensuring a better sleep to the patient. Silicone provides a gentle withdrawal without adhesion to the tissue.

PRODUCT PACKING :

1 pair of Silicone Nasal Splints (left & right)

Description	Colour	Standard Size
Silicone Splint	Transparent	NSL01

1 shipping carton contains 50 packs / pairs
